Dear NJAPD member,

On behalf of NJAPD, we are pleased to provide you with the DVD that will soon follow this mailing. The DVD was developed to assist professionals who are working to improve the oral health of infants, children, adolescents and their families.

These educational clips were scripted with the latest scientific data and were produced and filmed in a way that they are easily comprehensible and attractive to the target audience of children and parents, as well as other health professionals who may not be very familiar with oral health topics.

The video is divided in four segments in English, and the same four segments in Spanish. Materials in each segment cover topics that include the nature, progression and vertical transmission of dental caries, the importance of oral health, the role of fluoride and diet, a visit to the dentist, and the importance of age one examinations.

The DVD content and format is ideal to be presented either in a waiting room setting or to be watched individually or in a group. Single or multiple copies of this DVD resource can be obtained for distribution for our cost of \$5 plus shipping by contacting Dr. Crystal at [yasmio@aol.com](mailto:yasmio@aol.com)

NJAPD hopes this valuable patient education tool helps you spread the word on efficient ways to prevent dental caries in young children. Please feel free to contact me if you have comments or inquiries in reference to this DVD.

Sincerely,

Yasmi O. Crystal, DMD
